## WORK EXPERIENCE

---

### Accenture DACH

Lucerne, Switzerland

#### *DevOps Engineer & Associate Project Manager*

Oct 2022 - Present

- Successfully contributed making a cloud native PoC developed in Azure into production
- Developed and conducted technical onboarding workshops for new engineers
- Attestation of resources, budgeting and cost report elaboration
- Facilitated project resource allocation in alignment with company business priorities and budget adjustments
- Report of project updates, outcomes and deliverables to internal and external cross functional stakeholders

### Verisk Analytics Specialty Business Solutions

Malaga, Spain

#### *DevOps Engineer*

Jun 2021 - Sep 2022

- Infrastructure maintenance and optimization of on-prem, hybrid and cloud native projects
- Database orchestration and deployment transition to cloud resulting in 30% cost mitigation from Q2 to Q3
- AWS and Azure DevOps engineer, IaaS transition and GitOps adoption
- Conducted penetration and escrow testing for our pre-production environments
- Containerization issue mitigation (RabbitMQ through Docker swarm and associated microservices)
- Build & Release pipeline strategy implementation
- Documentation pipelines for allowing non-technical stakeholders access to project technical documents (MKDocs)

### Smart Campus, University of Malaga

Malaga, Spain

#### *Project Engineer and Content Manager*

Sep 2020 - Jun 2021

- Implementation of [organization website](#), content and maintenance
- Target student audience of 4000+ people
- Engagement in IRL activities sponsored by University of Malaga through our website and interactive map
- Positive sustainability messages and initiatives we made resulted in tangible actions (bee keeping, trash removal, etc.)
